About Me

I am a Python Developer with Python as my core strength, complemented by experience in web development, mobile application development, and Generative AI. I have hands-on experience building full-stack and AI-powered applications using React.js, REST APIs, and databases, focusing on scalable and efficient solutions.

Skills

- **Programming languages:** Python(Core), Java, C++
- **Web Development:** HTML5, CSS3, JavaScript, React.js, REST APIs, Bootstrap
- **Mobile Development:** Android (Java), React Native
- **Generative AI:** LLM, RAG, Ollama, Hugging Face, OpenClaw
- **Backend & Frameworks:** Django (Basic), FastAPI (Learning), Express.js, PHP
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase
- **Design Tools:** Figma, Photoshop, Canva
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, Databricks, n8n (Automation), Antigravity, MS Office, Windows OS

Experience

- **Data Engineer Intern**
  Breakthru.ai, Coimbatore | Jan 2026 – Present

  RAMS (Telecom Monitoring System)
  - Developed UI components and contributed to backend functionality
  - Supported remote asset monitoring features and system improvements

  Company Website
  - Designed and developed the company website as part of the UI team
  - Focused on responsive design and improved user experience

  Sakthi Group Dashboard (Databricks)
  - Developed C-level Databricks dashboards for financial analytics and integrated AI models for data-driven insights.
  - Integrated data from Oracle ERP (on-premise) and SAP (cloud)
- **Designer**
  i Way Pickup and Delivery Services, Trichy | Aug 2023 – Feb 2024

  Created social media and marketing content, designing campaigns to increase brand visibility. Improved audience engagement through creative design strategies.

Projects

- **SecureXtractAI (LLM Application)**
  Built a local LLM-based document processing system using Ollama and RAG with secure PDF/image handling and intelligent Q&A, ensuring complete data privacy.
- **FindIt-AI (Lost & Found Platform)**
  Developed an AI-powered platform using Django and Hugging Face for smart item matching with real-time chat and QR-based user verification.
- **BookIt (Android Application)**
  Created a movie booking app using Java and Firebase with real-time ticket tracking, authentication, and a flexible rescheduling feature.
- **CineStream (OTT Platform)**
  Built a responsive movie streaming platform using React.js and REST APIs with real-time data integration and smooth frontend-backend interaction.
